[LinkedIn](#) | [GitHub](#)

EDUCATION

Bennett University, Greater Noida

Bachelor of Technology – Computer Science and Engineering

CGPA: 9.69 / 10 | 2024 – 2028

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java

ML/AI: PyTorch, scikit-learn, YOLO, EasyOCR, Pandas, Hugging Face

Frameworks: FastAPI, React.js, Node.js, SpringBoot

Databases: MongoDB, MySQL

Tools & Cloud: Git, Postman, Vercel, Render, Firebase, PyPI packaging

EXPERIENCE

Web Developer Intern | Inkaranya Global

March 2026 – May 2026

- Developed [Planetarium42](#), a responsive web platform using **Next.js** and **TypeScript**.
- A global platform connecting planetariums worldwide, fostering collaboration, knowledge sharing, and greater accessibility to astronomy and science education.
- Built responsive and interactive user interfaces, optimizing performance and accessibility.

PROJECTS

Spectra – AI Chart Assistant for Visually Impaired Learners

[Github](#)

- Developed an accessibility-focused Chrome extension to convert chart visuals into structured insights (trends + values) for visually impaired users.
- Designed a multi-stage pipeline using a custom PyPI package ([graphvision-ai](#)):
 - Implemented a chart-type classification layer to route inputs to specialized models (bar, line, scatter), to improve efficiency and task-specific accuracy.
 - Trained YOLO models for detecting chart elements (bars, scatter points).
 - Integrated EasyOCR for text extraction and developed pixel-to-value mapping logic for multiple graph types
- Achieved high accuracy and speed across various chart types:
 - Up to 0.96 F1-score for categorical label extraction.
 - ~0.91 F1-score for bar chart value extraction (10% error threshold)
 - Optimized inference pipeline achieving ~5× speedup over DePlot.

[AgroVision](#) – AI-Powered Crop Intelligent System

[Github](#)

- Built a multilingual full-stack Progressive Web App (PWA) to assist farmers with

crop planning, fertilizer optimization, disease detection and market decision-making using AI.

- Developed a modular FastAPI backend integrating multiple ML models including crop and fertilizer recommendation models achieving 97% and 84.83% accuracy respectively on curated dataset and market price forecasting model using agricultural data for forecasting trends.
- Optimized frontend performance achieving GTmetrix Grade A with 98% performance, 95% structure.

[MedScope](#) – ML-Based Adverse Drug Event Predictor

[GitHub](#)

- Built an ML-powered web application to predict adverse drug event severity using the FAERS dataset.
- Trained multi-class classification models achieving 0.72 micro-precision on high-cardinality medical data predict side-effect severity and deployed model inference pipelines with FastAPI backend on Hugging Face Spaces.
- Measured average inference latency of ~427ms under concurrent requests using k6.

HONORS & AWARDS

Software Engineering Certification (Elite) – IIT Kharagpur (NPTEL) | [Verify](#)

- Awarded "**Elite**" status for a consolidated score of **75%**; ranked in the **Top 5%** of **4,458** candidates nationwide.

Smart India Hackathon 2025 — Selected in top 10% of 620 college teams (Rank 55) for internal selection round.

Top 10 position in Stellaris Hackathon organized by [GeeksforGeeks ABESEC](#), Ghaziabad.
